

DEXIS ANNOUNCES PARTNERSHIP WITH CIRCLE ONE™ TO ACCELERATE DIGITAL CHAIRSIDE DENTISTRY

- Collaboration Introduces Powerful Scan-To-Plan Workflow Solution -

Quakertown, PA (October 2, 2025) – The global leader in dental imaging, DEXIS™, is pleased to announce the expansion of its ecosystem through a partnership with Circle One™, a France-based leader in effortless and advanced chairside solutions. This collaboration provides practitioners with the tools to deliver greater control of the patient experience, advancing digital chairside dentistry into the future.

“At DEXIS, we partner with leading innovators to deliver smart and efficient digital workflows for our customers. With our latest integration, scans from DEXIS intraoral scanners can be exported to Circle One – unlocking a seamless scan-to-plan workflow, driving better and more efficient treatment planning from the chairside,” said Robert Befidi, President of DEXIS.

Seamlessly integrated with DEXIS intraoral scanners through a dedicated API, Circle One takes practitioners from scan to export in just a few clicks. In under a minute, the cloud-based AI generates a functional design ready-to-validate or adjust, without installation or extra equipment.

“DEXIS intraoral scanners, powered by IS ScanFlow connected to Circle One will provide DEXIS customers with a chairside solution enabling them to design crowns, inlays, onlays, overlays, and veneers in less than a minute, thanks to unparalleled design simplicity,” shared Sébastien Lenoir, CEO of Circle. “Our solution also allows one-click export of designed files to leading printing and milling machines on the market. With speed, simplicity, and openness, we empower our customers to create the chairside workflow that works best for them.”
