worldwide

200+
products
 and solutions

10
 subsidiaries
 with distribution
 to over **100 countries**

 made in France

That's what's at the heart of the Biotech Dental family. Established in France 35 years ago, Biotech Dental provides industry-changing products to dentists in over 100 countries. And now we've brought our passion for increasing the capabilities and success of dentists to the United States.

The Biotech family includes over 700 employees, and together we offer integrated products that are more affordable, provide faster procedures, and most importantly, ensure more successful patient outcomes. Our implant, orthodontic, digital, regenerative, and aesthetic solutions are designed to bring real and lasting improvement to the quality of life of your patients. In the U.S. market we are supported by local field sales and customer service teams, thousands of nationwide dealer representatives, and continuing education for our clinician partners. **We look forward to working together with you to create a world of smiles.**

OUR FAMILY OF DENTAL SOLUTIONS

SMILERS® Aligners

Smilers are a better and more affordable aligner therapy that gives you total control of the procedure, provides better results, and is priced to compete with aligner clubs.

KONTACT® Implants

KONTACT offer a host of performance benefits to both clinicians and patients. Its patented connectivity and extensive prosthetic range allow KONTACT to meet all of your restorative needs.

OUR FOCUS

Affordability

Our technologies and products are affordable, allowing us to bring the highest level of quality and results to the largest number of dental practices possible.

Innovative Technologies

For 35 years we've been creating a range of products designed to exceed expectations and help dentists excel.

Quicker Procedures

Our products and solutions provide dentists with shorter chair time, increasing profitability and case-load while creating greater comfort and satisfaction for their patients.

Single-Source Provider

With a broad range of products and solutions all in one place, we make partnering with us easier and more efficient.

ATP38® Miracle

The ATP38 Miracle uses the principle of photobiomodulation to convert light into metabolic energy that increases the natural restorative metabolism of the cells in tissue and bone.

Nemotec Digital Dentistry

Nemotec offers multi-disciplinary open software solutions to diagnose, plan, and communicate effective treatment plans.
