

Joshua Bevans, DDS

Background

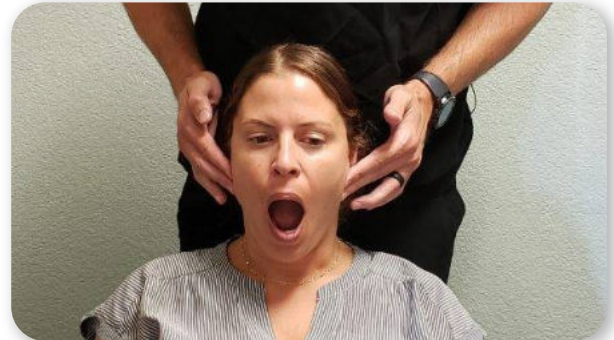

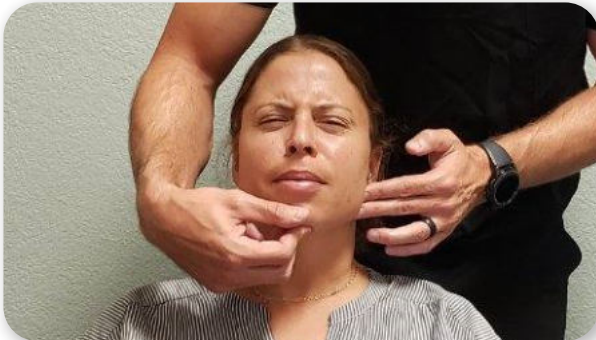

Born in Calgary, Alberta, Dr. Joshua M. Bevans, DDS graduated in 2008, obtaining his DMD degree from the faculty of dentistry at the University of the Pacific. He currently practices at Comfort Dental as a general dentist in CO and AZ states. Dr. Bevans is a proud father of three and is a cancer survivor.

? How long have you been in practice?

I've been at the current practice since January of 2011, over 11 years in Colorado Springs, CO and Gilbert, AZ.

? How would you describe your practice?

We have worked hard to make our dental practice a friendly helpful environment that has affordable prices and high-quality care.

? How many patients do you see for TMJ on average per month?

Approximately 5-10 patients a month.

? What have been your findings on the use of our radio frequency modalities for the treatment of TMJ?

The great advantage of this treatment modality is it is instant relief and is like having a physical therapist in the office. For some patients, they have lasting relief after only a few treatments, but the beauty of the system is the patient has always experienced less pain after the treatment.

? How do you feel about the use of our modalities for aesthetic treatments in your practice?

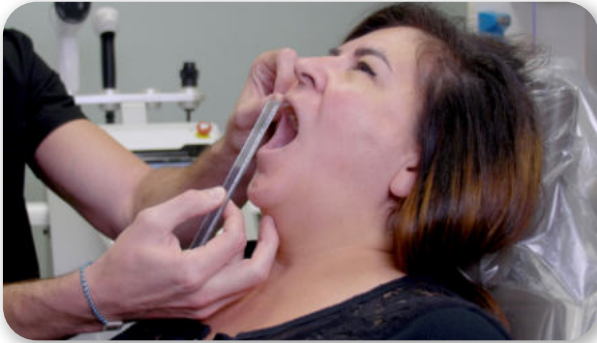

Viora was something that generated excitement and breathed new life into our practice by both patients and staff. The technology and capabilities helped to boost our office's image and makes us stand out from the several surrounding practices. Patients that come for cosmetic procedures are typically enthralled by the possibilities and other patients are wowed by the vast menu of services we can now offer.

TMJ SUCCESS STORY – Dr. Joshua Bevans

? What would you say your Viora device has done for your practice?

The Viora system and team are top-notch and their entry into the dental market is a revolutionary step to offering our beauty and preventative conscientious patient treatments that help their confidence in ways that a smile makeover can and takes it to the next level. Patients have something new and different to talk to their friends and family about and will bring new patients into the office. Your staff will love it as a perk for working and being loyal to the practice and is a fun and cost-effective way to keep them happy.

? What would you say to another dentist considering bringing on our systems were aesthetic purposes as well as TMJ?

Get a demo scheduled and see for yourself the results of a high-tech machine that offers very comfortable aesthetic treatments! you won't be disappointed.

Reaching New Heights with the V - Multi-technology Platform

The V20 Platform incorporates sophisticated PCR™ technology for light-based treatments and Viora's groundbreaking CORE RF technology within one system. This allows you to offer your clients the safest, most effective and efficient treatments on the market, with little to no downtime.

About Viora
