

BIOlogical™10

Test results in just 10 hours.

In-Office Biological Monitoring System

A breakthrough for in-office biological monitoring -

Now you can meet daily biological monitoring requirements for steam sterilizers in less than half the time... with BIOlogical™10, the first system that delivers results in just 10 hours.

SYSTEM COMPONENTS:

Item #3703
BIOlogical10 Steam Biological Indicators:
100 Indicators/Box

Item #3701
BIOlogical In-Office Monitoring Incubator:
Incubator & Manual

BIOlogical™10 offers everything you need to verify sterilizer performance:

- ✓ Automatic e-mail and text notifications help you keep on top of your regular testing schedule.
- ✓ Complete sterilization test results are stored within the **OnTraQ** online compliance management system.
- ✓ Online documentation of test results via **OnTraQ** provides a tangible record, as well as a legal document, when proof of sterility must be provided.
- ✓ Compatible with steam, dry heat, chemical and etc.

Easy to use & Easy to read results:

Simply process the indicator in a normal sterilizer cycle at the end of the day. Activate the indicator, place it in the incubator, then see and record the results the next morning! If any bacterial spores survive the process, the indicator media will turn yellow.

Complete:

Everything you need for effective biological monitoring of steam sterilizers, including incubator, indicators, manual and access to **OnTraQ** online compliance management software.

Rest-assured... **OnTraQ** will protect your practice from non-compliance

HealthFirst's **OnTraQ** Compliance Management System will keep you informed of all related biological spore testing tasks in your office, the timely completion of these tasks and archiving of test results.
